

## D-LAM 100

TDS40 Rev1 01/04/09

### Controlled Paint Removal Material

#### DESCRIPTION

D-Lam 100 concentrate is a solvent based gel formulated for the removal of paint.

#### USES

To remove paint and coatings from timber plaster and masonry.

#### FEATURES

- ✓ Non caustic
- ✓ Can be used on most substrates
- ✓ Non methylene chloride

#### TECHNICAL DATA

S.G. 1.0 – 1.1  
Flashpoint (deg C) 52 (Pmcc)  
Miscible with water.

#### APPLICATION

Apply D-Lam 100 by roller or brush at the rate of approximately 1m<sup>2</sup> per litre.

The reaction time will depend on the type of paint and thickness of the applied layers.

It is advisable to apply a test area prior to the commencement of each project to assess its suitability and most effective application method.

#### CLEAN UP

Wash all equipment in water.

#### PACKAGING

Container Size: 4 Litre and 20 Litre containers.

#### SAFETY

Refer to Westgate Pty Ltd Material Safety Data Sheet (MSDS) for instructions.
